

Brand and Reputation Management Portfolio Task

1. POSITIONING

"I help early-stage startups and digital health/fintech platforms to increase user retention and reduce onboarding drop-offs by designing intuitive, conversion-focused mobile and web product interfaces."

2. PROFILE

- **Headline:** Product (UI/UX) Designer | Crafting Intuitive Digital Products That Drive Growth & Conversion
- **Bio:** I partner with tech startups and businesses to transform complex ideas into seamless, user-friendly mobile and web experiences. Specializing in end-to-end UI/UX design, research, and interactive Figma prototyping, I build digital products that users love and businesses grow with.
- **Call to Action (CTA):** Ready to scale your product experience? **Book a free 15-minute discovery call** or drop a message to discuss your project.

3. TRUST

- **Testimonial Request (to client):** "Hi [Client Name], it was great working on [Project Name]! Could you share a quick 2-sentence feedback highlighting the problem we solved together and the outcome of the new designs?"
- **Sample Testimonial (Problem + Result):** "Our mobile application had a high user drop-off rate during onboarding. After redesigning the flow and UI, our signup conversion rate increased by 35% within the first month. High-quality, fast, and incredibly intuitive designs!"
- **Response to Feedback ("Communication was slow and project delayed"):**

"Thank you for the candid feedback. I sincerely apologize for the communication gaps and timeline slippage during the project. To ensure this never happens again, I have implemented weekly async milestone updates in Notion and set up fixed daily communication check-ins for all active client projects."

4. IMPROVEMENT

- **Two Weaknesses Identified:**

- ✓ *Weakness 1:* Profile headline was previously too generic ("UI/UX Designer at your service"), failing to communicate business outcomes.
- ✓ *Weakness 2:* Lacked a clear, single call-to-action (CTA), leaving potential clients uncertain about how to initiate work.

➤ **Rewritten Section (Headline):**

1. **Old Headline:** *Freelance UI/UX Designer & Web Developer*
2. **New Headline:** *UI/UX Designer | Helping Startups Turn Complex Products into High-Converting Digital Experiences*
