

GATEWAY Program

My Legal-Ready Business Kit

A comprehensive portfolio project for student freelancers and aspiring entrepreneurs in Lagos — building the legal and risk management foundation your business deserves.

INTEGRATED PORTFOLIO PROJECT

Project Overview & Objective

This portfolio project challenges you to move beyond theory and build something real. You will create a **complete, legal and risk-ready business package** for your own freelance or entrepreneurial venture — one you can actually use when you start working with clients.

By the end of this project, you will have a professional suite of documents that protects your work, your income, and your reputation. This is not a hypothetical exercise — it is the foundation of a sustainable business.

What You Will Produce

- A legally sound Service Agreement
- An Intellectual Property protection plan
- A structured Risk Management plan
- A Business Formalisation roadmap

Portfolio Components

Your business kit is built across four integrated lessons. Each component addresses a critical pillar of running a legally robust freelance or entrepreneurial business in Nigeria.

1

Service Agreement

Lesson 1 — Define the scope of your services, set clear payment terms and delivery timelines, and include a dispute resolution clause to protect both parties.

2

Intellectual Property Plan

Lesson 2 — Identify your creative output (designs, code, writing), state clear ownership terms, and draft a simple Non-Disclosure Agreement (NDA).

3

Risk Management Plan

Lesson 3 — Identify at least three key risks (e.g., non-payment, data breach, scope creep), propose mitigation strategies, suggest relevant insurance, and outline data protection practices.

4

Business Formalisation Plan

Lesson 4 — Choose your business name and structure (Sole Proprietorship), outline the steps to register with the CAC, list required documents, and identify any permits you may need.

Pro Tip: Each component builds on the last. Complete them in order to ensure your business kit is coherent, consistent, and ready to present to a real client.

Capstone Scenario: The Real-World Test

Scenario: You are a student freelancer offering graphic design services in Lagos. A company approaches you for a long-term project. This is your moment — handle it like a professional.

Draft a Contract

Write a simple and complete service agreement covering scope, fees, timelines, revisions, and a dispute resolution clause tailored to this client engagement.

Protect Your Designs

Clearly state who owns the creative work at each stage. Draft a brief NDA and specify licensing terms to safeguard your intellectual property.

Identify the Risks

Map out the risks specific to this long-term project — including scope creep, delayed payments, and confidentiality breaches — and document your mitigation strategies.

Register or Wait?

Analyse whether to formalise your business with the CAC now or later. Justify your decision based on the size, duration, and nature of this project.

Good luck. You have the knowledge, the tools, and the framework. Now build something that lasts. 🚀
