

AI for Budgeting — Worksheet

Use this worksheet after reading the Module 6.5 guide. Fill it in with your real numbers — not estimates. The more honest your inputs, the more useful your budget will be.

Question 1 — Calculate Your Average Monthly Income

Example: Jan – \$300,000 | Feb – \$180,000 | Mar – \$420,000. Average = \$300,000. I will budget as if I earn \$300,000 every month.

Month 1 income (\$):	650,000
Month 2 income (\$):	680,000
Month 3 income (\$):	620,000
My 3-month average (add all 3, then divide by 3):	650,000 (Formula: $(650,000 + 680,000 + 620,000) / 3$)

Question 2 — Build Your Monthly Budget (50 / 20 / 10 / 10 / 10 Framework)

Example: Average = ■300,000. Needs = ■150,000 | Savings = ■60,000 | Investment = ■30,000 | Emergency = ■30,000 | Lifestyle = ■30,000.

50% Needs (rent, food, transport, data):	50% Needs (rent, food, transport, data): 325,000
20% Savings:	20% Savings: 130,000
10% Investment:	10% Investment: 65,000
10% Emergency Fund:	10% Emergency Fund: 65,000
10% Personal / Lifestyle:	10% Personal / Lifestyle: 65,000

Question 3 — Set a Savings Target Using AI

Example: I want to save ■1,000,000 in 12 months. That means ■83,333 / month (28% of my ■300,000 average). I asked AI if this is realistic and it suggested stretching to 18 months to keep my plan sustainable.

My savings goal and timeline:	My savings goal and timeline: 1,500,000 in 12 months
Monthly savings required:	Monthly savings required: 125,000 / month (19.2% of average monthly income)
AI prompt I will use to verify this plan:	AI prompt I will use to verify this plan: "If my average net monthly income is 300,000, is saving 125,000 per month realistic?"

Question 4 — Plan for a High-Income Month

Example: If I earn ■600,000 this month (double my average), I will: put ■100,000 into emergency fund, invest ■100,000, save ■50,000 extra, and allow myself ■50,000 for lifestyle. The rest goes toward next month's commitments.

If I earn double my average, I will allocate the extra...	40% (260,000) into long-term investment yield assets. 30% (195,000) into
---	--

Question 5 — Plan for a Slow Month

Example: If income drops to ■120,000, I will pause discretionary spending, draw from my emergency fund only for non-negotiables, and not touch my savings or investments.

If my income drops below my average, I will...	If my income drops below my average (e.g., to 350,000), I will: Pause lifes
--	---

Question 6 — Your AI Tool & Commitment

Example: I will use ChatGPT every 1st of the month to review my budget and adjust based on last month's actual income.

The AI tool I will use:

☒ ChatGPT
 ☐ Notion AI
 ☒ Google Sheets + AI
 ☒ Excel Copilot
 ☐ Other

I will review my budget on this date each month:	I will review my budget on this date each month: 1st day of every month.
--	--

Reflection

What is the ONE budgeting habit you will start this month based on your numbers above?

Enforce the 50/20/10/10/10 split immediately on all incoming payments prior to making discretionary
