

Guide on how to set up accounts on Grey, Geegpay, and Payoneer.

This guide covers setting up Grey, Geegpay, and Payoneer accounts, primarily for freelancers in Nigeria and other African regions looking to receive international payments. [1, 2, 3, 4]

1. General Checklist (Prepare These First)

To avoid getting stuck during registration on any of these platforms, ensure you have:

- * A Valid Government ID: International Passport, Driver's License, or National ID (NIN).
- * Proof of Address: A bank statement or utility bill (electricity, water, internet) issued within the last 3 months.
- * Exact Name Match: The name on your IDs must match the name on your local bank account and the name you use to register.
- * Stable Internet & Updated App: Use the latest version of the mobile apps to prevent technical glitches. [5, 6, 7, 8, 9, 10, 11, 12]

2. Platform Specific Setup Guides## Grey (Grey.co)

- * Sign Up: Create an account on the Grey website or app using your legal name and email.
- * KYC Verification: Upload a clear photo of your ID and take a high-quality selfie when prompted.
- * Address Verification: Submit your proof of address. Ensure the address you type into the form matches the document exactly.
- * Virtual Account Request: Once verified, navigate to "Accounts," select your desired currency (USD, GBP, or EUR), and click "Get your bank account". [2, 13, 14, 15, 16]

Geegpay (by Raenest) [17]

- * Account Type: Visit the Geegpay website and select "Freelancer" for a personal account.
- * Personal Profile: Fill in your details. Nigerian users will typically need to verify their BVN and phone number via OTP.
- * Identity & Selfie: Upload your ID (NIN, Passport, or Voter's Card) and take a live selfie.
- * Occupation & Employer: You may be asked for your occupation (e.g., blogger, student) and employer details (e.g., Amazon KDP or Upwork).
- * Virtual Bank Account: Go to your dashboard, select a currency, and click "Request account details". [7, 9, 18, 19, 20]

Payoneer

- * Registration: Visit [Payoneer](https://www.payoneer.com/) and select "Individual".

- * Security Details: Set a strong password and a security question you can easily remember, as you will need this for future verifications.
- * Local Bank Link: You must provide a local bank account in your name for withdrawals. The name must match your Payoneer registration.
- * ID Verification: Submit your ID details in the "Verification Center" under Settings.
- * Unlocking Currency Accounts: You may need to receive your first \$50–\$100 from a marketplace (like Upwork or Fiverr) before you can apply for individual USD/GBP receiving account details. [5, 11, 21, 22, 23, 24, 25]

3. How to Avoid Common "Stuck" Points

- * Address Mismatches: If your utility bill says "St." but you typed "Street," your application might be flagged. Match the text perfectly.
- * Multiple Accounts: Never create more than one account on the same platform; they will both likely be blocked.
- * Blurry ID Photos: Use natural lighting and ensure all four corners of your ID are visible in the photo.
- * Inconsistent Activity: For Payoneer, stay active. An annual fee of \$29.95 may apply if you receive less than \$2,000 in a year. [1, 5, 7, 8, 11, 26, 27, 28]
