

Data-Driven Financial Decisions — Worksheet

You don't need an accounting degree to run your finances well. You just need five numbers, three simple reports, and a monthly review rhythm. This worksheet walks you through all of it — one section at a time.

Question 1 — Track Your 5 Important Numbers This Month (Video 7.1)

Fill in your actual figures for this month. If you don't have them yet, open your bank statement now and count.

#	What to Track	Example	My Amount This Month
1	Total Income	■500,000	680,000
2	Total Expenses	■300,000	511,000
3	Profit (Income – Expenses)	■200,000	169,000
4	Savings Amount	■60,000	169,000 (transferred into emer
5	Outstanding Invoices	■80,000	150,000

Question 2 — What Does Your Profit Tell You? (Video 7.1)

Example: My profit this month was ■200,000. That is 40% of income. Last month it was ■120,000. I am growing — but expenses also rose by ■50,000.

My profit this month:	169,000 NGN (24.8% net profit/savings margin).
Compared to last month, it is:	Increased by 31,000 NGN due to bonus client project completions.
What this tells me about my business:	My core service offerings generate consistent surplus, but higher variable

Question 3 — Your Net Worth Snapshot (Video 7.2)

Example: I own — Laptop ₦800,000 + Savings ₦500,000 = ₦1,300,000. I owe — Loan ₦300,000. Net Worth = ₦1,000,000.

What I Own (Assets)

Hardware & Workstation Setup (Laptops, Canon Prii
Emergency & Savings Accounts: 780,000
Investments & Mutual Funds: 450,000

What I Owe (Liabilities)

Debt & Outstanding Loans: 0
Outstanding Receivables / Invoices: 150,000
Total Liabilities: 0

My Net Worth (Assets – Liabilities):	My Net Worth (Assets - Liabilities): 3,230,000 NGN
---	--

Question 4 — Your Monthly Management Review (Video 7.3)

Example: My highest-paying client this month was a branding project — ₦180,000. My rising expense was software subscriptions — up ₦15,000. I overspent on transport.

Which client paid the most?	CardioAI Nova / JoiHealth clinical software retainer project.
Which service made the most profit?	Custom UI/UX design sprints & clinical software architecture consulting.
Which expense increased this month?	Mobile data and internet connectivity fees (up by 4,000 total).
Where did I overspend?	Groceries and personal food supplies (exceeded budget by 5,000).

Question 5 — Set Up Your Simple Tracking System (Video 7.4)

Example: I use Google Sheets with columns: Date | Client | Income | Expense | Category | Paid? | Notes. I update it every Friday morning.

The tool I will use to track my finances:

- ☒ Google Sheets
 ☒ Excel
 ☐ Notion
☐ Wave Accounting
 ☐ Kuda Analytics
 ☐ Other

My column headers will be:	Date Client / Category Income Expense Sub-category Invoice Status
I will update my tracker:	Every Friday at 4:00 PM.

Question 6 — Turn Your Numbers into Decisions (Video 7.5)

Example: Income dropped last month. Decision: I will post 3 times a week on Instagram and follow up on 5 cold leads. Expenses rose — I will cancel 2 unused subscriptions.

If income dropped this month, I will:	Send 5 tailored outreach proposals for UI/UX design audits to active health
If expenses rose, I will:	Audit all recurring subscriptions and switch internet/data plans to bulk mo
If profit is low, I will:	Enforce a strict 50% upfront deposit rule and increase basic project tiers b

Question 7 — Your Monthly Review Rhythm (Video 7.6)

Example: Week 1 — I review income every 1st Monday. Week 2 — I log all expenses by Wednesday. Week 3 — I check savings on the 15th. Week 4 — I plan next month on the last Friday.

Week 1 — Review income on:	1st Monday of the month
Week 2 — Log expenses by:	2nd Wednesday of the month
Week 3 — Check savings on:	15th of the month
Week 4 — Plan next month on:	Last Friday of the month

I commit to running this monthly review starting from:

October 1, 2026

Reflection

Looking at your 5 numbers this month — what is the ONE thing you will change next month?

Collect outstanding invoices immediately upon project completion before starting new client mileston
