

GATEWAY Program

The "AI-Powered Business Launchpad"

A. The AI Strategy Brief (Lesson 7.1):

- **The Personal Brand Philosophy:** Draft your "Verified Human" statement for your profile. Write your 2-sentence promise to clients regarding how you use AI to enhance speed while providing your own "Human Soul" and local context.

e.g. Personal Brand Philosophy (Human Soul Statement): "I use AI to handle data-heavy research and initial drafting so that I can focus on providing strategic solutions and creative 'Nigerian flavor' that no machine can replicate. I authorize every final word to ensure your brand remains authentic and human-centric".

The Personal Brand Philosophy:

I use AI to streamline competitive research, user persona drafting, and initial layout ideation so that I can focus on empathetic user research, intuitive interaction design, and local aesthetic context that no machine can replicate. I personally test, refine, and authorize every user flow and visual component to ensure your product remains human-centric and seamless.

- **The Career Insights Report:** Use AI to analyze three job descriptions in your niche. List the 3 most requested "Global Power Skills" the AI identified.

e.g. The Career Insights Report (Global Power Skills): After analyzing three job posts for "Virtual Assistant" roles, the AI identified these trending skills:

- *E-commerce Platform Management (Shopify/Amazon).*
- *Strategic Email Marketing Automation.*
- *SEO-Optimized Content Ghostwriting.*

The Career Insights Report (Global Power Skills): After analyzing three job posts for "UI/UX Designer" roles, the AI identified these trending skills:

1. Design System Architecture & Maintenance (Figma)
2. User Research Synthesis & Usability Testing
3. Accessibility Compliance & Inclusive Design (WCAG Standards)

GATEWAY Program

B. The Engine Room (Lesson 7.2):

- **The Power Prompt Library:** Create one "Master Prompt" for your niche using the **R-T-F (Role-Task-Format)** Framework.

Role:

e.g. The Power Prompt (R-T-F Framework):

Role: "Senior Content Strategist for Tech Startups".

The Power Prompt (R-T-F Framework):

Role: "Senior UI/UX Designer and Product Strategist".

Task:

Task: "Create a 4-week SEO content calendar for a Fintech blog".

Task: "Create a user journey map and UI component checklist for a mobile fintech onboarding flow aimed at first-time users."

Format:

Format: "A table with columns for Date, Topic, Primary Keyword, and Target Audience"

Format: "A table with columns for Journey Stage, User Goal, Pain Points, UI Component/Screen Needed, and Microcopy Suggestion."

- **The AI Workflow Map:** List the 3 tools you will use in sequence to finish a project.

Step 1 (Research): [e.g., ChatGPT]

e.g. Step 1 (Research): Use ChatGPT to summarize market trends from client transcripts.

Step 1 (Research): Use ChatGPT to analyze user feedback transcripts, synthesize pain points, and draft user personas.

GATEWAY Program

Step 2 (Creative/Visual): [e.g., Canva AI]

e.g. Step 2 (Creative): Use Canva AI to generate visual layout options for the project.

Step 2 (Creative/Visual): Use Canva AI / Figma AI to rapidly generate visual layout options, iconography ideas, and moodboards.

Step 3 (Refinement): [e.g., Grammarly]

e.g. Step 3 (Refinement): Use Grammarly to polish the tone and ensure zero typos.

Step 3 (Refinement): Use Grammarly to polish UI microcopy (button labels, error messages, tooltips) for clarity, brevity, and tone.

C. The Ethical Shield & Impact (Lesson 7.3):

The Security Audit: List 2 specific data privacy rules you will follow when using AI tools (e.g., never uploading client passwords).

e.g. Security Audit (Data Privacy Rules):

I will never upload client passwords, trade secrets, or internal financial reports to any AI tool.

I will only feed the AI generic project parameters or public data to protect client confidentiality.

The Security Audit (Data Privacy Rules):

"I will never upload raw user interview recordings containing Personally Identifiable Information (PII), proprietary client wireframes under NDA, or internal product roadmaps to public AI models. I will sanitize all inputs using generalized parameters and dummy data to protect client confidentiality."

- **The AI Impact Report (Mock):** Based on your new workflow, estimate your efficiency gain

Manual Time (estimated): **[e.g., 5 hours]**

e.g. Manual Time: 5 hours (Research and drafting).

Manual Time (estimated): 6 hours (Synthesizing user research, wireframe planning, and microcopy writing).

GATEWAY Program

AI-Enhanced Time (estimated): [e.g., 1 hour]

e.g. AI-Enhanced Time: 1 hour (Prompting and human refinement).

AI-Enhanced Time (estimated): 1.5 hours (Prompting for structure, synthesizing patterns, and human design refinement).

Strategy for "Found Time": How will you use the hours you saved to grow your business?

e.g. Strategy for "Found Time": I will use the 4 hours saved to source high-value clients on LinkedIn and perform peer reviews for my scaling partners.

Strategy for "Found Time": "I will use the 4.5 hours saved to conduct live usability testing sessions with real users, refine interactive Figma prototypes, and outreach to high-value clients on LinkedIn."
