

GATEWAY Program

The Business Sustainability & Growth Plan

1. Portfolio Task: The "Business Sustainability & Growth Plan"

A. Relationship Management (The Proactive Update):

- **The Friday Update:** Write a 3-sentence professional update for a fictional client using the formula: **[Finished This Week] + [Next Steps] + [Potential Blockers]**.

e.g. The Scenario: You are managing a social media page, and it is Friday morning.

e.g. The Friday Update: "This week, I finished 5 custom graphic posts and scheduled them for next week. Next week, I will focus on responding to all new comments and growing our follower count. I don't see any blockers, but I will let you know immediately if my local power outage lasts longer than expected."

This week, I completed the initial user research synthesis, baseline journey mapping, and wireframes for the core user onboarding flow. Next week, I will focus on building high-fidelity interactive prototypes in Figma and conducting a round of unmoderated usability testing. I do not foresee any blockers, but I will inform you immediately if we experience any delays in receiving the updated brand guidelines or assets from your team.

B. The Growth Strategy (Upselling & Cross-selling):

- **The Upsell:** Identify one premium upgrade for your specific niche.

e.g. The Upsell: A premium "Instagram Growth Package" that includes daily video stories instead of just static images.

The Upsell (Premium Upgrade): Offering a comprehensive, scalable **Figma Design System & Component Library** instead of just static page designs. This allows clients to easily scale their product and keep brand consistency as they grow.

- **The Cross-sell:** Identify one related service you can add to help your client's overall goal.

e.g. The Cross-sell: Adding a 30-minute "Monthly Analytics Report" to show the client exactly how their business is growing.

The Cross-sell (Related Service): Adding a **UX Audit / Accessibility & Usability Inspection** or an interactive **Prototype Usability Testing Session**. This helps ensure the product isn't just visually appealing, but also accessible, compliant, and optimized for real user conversion goals.

GATEWAY Program

- **The Buy-in Script:** Write the exact message you would send to the client to suggest these services using the "Consultant" mindset (Why before How Much).

e.g. The Buy-in Script (Consultant Mindset): "I noticed your followers are most active during your live sales. Would you be open to adding 3 short video reels a week to your plan? This upgrade would help us reach more people who aren't yet following the page."

I noticed during our initial user journey mapping and competitive analysis that users experience noticeable friction during the checkout/onboarding flow, which likely contributes to drop-off before feature adoption. Would you be open to expanding our scope to include a full UX Audit & Scalable Design System? This would eliminate UX inconsistencies, improve accessibility compliance, and significantly speed up your development team's workflow when building new features.

C. Business Financials (The 3-Jar Harvest):

- **Project Fee:** ₦100,000

- **Jar 1 (Business Operations - 20%):** ₦

e.g. Jar 1 (Business Operations - 20%): ₦20,000 (Set aside for your data, power, and any app subscriptions like Canva or Grammarly).

Jar 1 (Business Operations - 20%): ₦20,000 (Set aside for operational expenses such as data subscriptions, power/fuel costs, cloud hosting/server fees, and software tools like Canva or OpenAI/Grammarly).

- **Jar 2 (Savings - 20%):** ₦

e.g. Jar 2 (Savings - 20%): ₦20,000 (Your 'Rainy Day' fund for slow months or to buy a better laptop).

Jar 2 (Savings - 20%): ₦20,000 (Emergency and capital reinvestment fund saved for business lean months or hardware upgrades like a higher-performance laptop).

- **Jar 3 (Salary/Personal - 60%):** ₦

e.g. Jar 3 (Salary/Personal - 60%): ₦60,000 (This is your personal money to keep for yourself and your family).

Jar 3 (Salary/Personal - 60%): ₦60,000 (Personal take-home compensation for personal and family upkeep).
