The Niche Mapping Tool

A. Worksheet: "The Niche Mapping Tool" Purpose: A 4-step exercise to help you find your "Specialty."

Content: A table where you list:

1. What you enjoy doing.

e.g. I enjoy organizing schedules and keeping track of complex details.

Breaking down complex technical concepts, organizing information logically, and learning how to design clear visual layouts for software tools.

2. What you are already good at

e.g. I am excellent at using Google Calendar, Excel, and responding to emails quickly.

Analytical thinking, data handling, and technical problem-solving from prior foundational training in Data Analytics, Data Science, and Data Engineering.

3. Which digital role from the list matches those two.

e.g. Virtual Assistant (VA).

UI/UX & Product Designer

4. Who your typical client would be.

e.g. Busy tech founders in Abuja who need help managing their daily operations.

Early-stage SaaS and tech startups that need clear, intuitive interfaces and dashboards for complex software.
